What is The Human Competency Network?

The Human Competency Network™ is a global community of learners, facilitators, leaders, educators, coaches, faith-based organizations, and businesses committed to developing the human skills needed to thrive in a rapidly changing world.

As artificial intelligence continues to transform how we work, the Network focuses on the competencies that remain uniquely human—self-awareness, emotional intelligence, communication, resilience, leadership, psychological safety, empathy, and ethical decision-making.

Whether you are seeking personal growth, professional development, or organizational transformation, the Human Competency Network provides a pathway to learn, teach, and lead.

Our Mission

To cultivate human-centered excellence by equipping individuals and organizations with the competencies required to flourish at work, at home, and in life.
